

INSTRUCTIONS - Use a good quality glue stick for best results.

1. Cut out the Flexangle.
2. Fold along the dotted lines folding printed sides together. Open out after each fold.
3. Fold along the black diagonal lines, folding plain sides together. Open out after each fold.
4. Put glue on the 3 large 'GLUE' areas.
5. Form the paper into a tube.
6. Add glue to the end tabs. Make the tube into a hexagon and tuck in the end tabs into the open end.
7. Carefully press to seal.

Flexangles are bit fiddly to assemble.
It's good to have a practice before
spending a lot of time colouring one in!
